Here's the version without the challenge grant concept. My question for you Suzanne, is that something we are willing to commit to? It typically involve some level of award funding (100K) and that would most likely come from the program. Also, do you have any impression about the administration's view on these type of challenge grants?

I sent a rough draft to Jay yesterday. We then thought adding a competition would be good. I don't know where it is now. I think he is querying someone.
